New version of MathSciNet released!

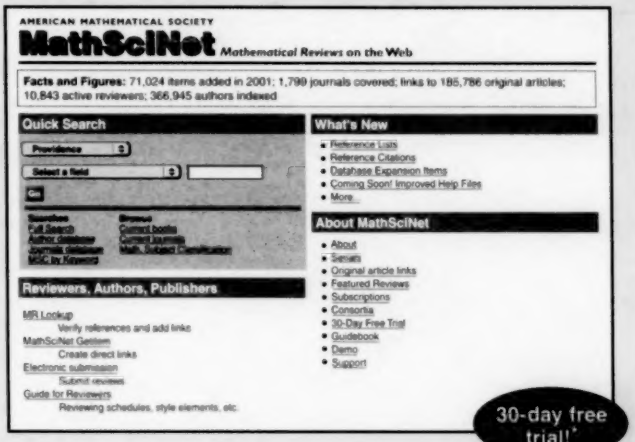
In 2001, the AMS released a new version of MathSciNet to subscribers. New features and enhancements include:

Reference lists

- Full reference lists from original items are now available in MathSciNet. Lists have been added initially from 65 leading math journals, covering material published since January 2000.

Reference citations

- Reference citations are now available in MathSciNet. If an item appears in a MathSciNet reference list, a Reference Citations link is displayed. This link will bring you to a Headline list of those MathSciNet items whose reference lists include the on-screen item.



Database expansion items

- The MR Database has been expanded to include items in the area of Applied Statistics. These database expansion items receive full author identification, journal linking, and original item linking (when available).

Improved search screens

- Modifications have been made to improve the MathSciNet search screens, making them more user-friendly.

See www.ams.org/msnhtml/whats_new.html for additional details.

MathSciNet Facts and Figures as of Fall 2001:

71,024 items added; **1,799** journals covered; links to **185,786** original articles; **10,843** active reviewers; **366,945** authors indexed

MathSciNet Consortia Pricing

The AMS is pleased to offer consortia pricing for MathSciNet, your premier source for searching over 60 years of mathematical literature in the MR Database. The AMS's goal is to increase MathSciNet access to the mathematical research community. Consortia arrangements can be very valuable for small- and mid-sized institutions that have relatively limited budgets.

As a result of AMS consortia pricing arrangements, there are over 90 Consortia worldwide that now enjoy access to MathSciNet. Participants include over 900 public and private colleges and universities, community colleges, satellite campuses, corporations, and more.

See www.ams.org/bookstore/mathsciprice#consortia for additional information.

Links from MathSciNet to Online Articles

Linking capabilities continue to expand. MathSciNet now provides over 180,000 links from reviews directly to original articles in over 220 journals from commercial, society, and independent publishers.

AMS Electronic Journals

www.ams.org/journals

- Over 100 years of the highest quality in mathematical research
- Unique articles, book reviews, and reports
- Editors who are prominent in their fields
- Subscribe to the 2002 print versions of *Journal of Algebraic Geometry* (JAG), *Journal of the American Mathematical Society* (JAMS), *Mathematics of Computation* (MCOM), *Proceedings of the American Mathematical Society* (PROC), *Transactions of the American Mathematical Society* (TRAN) or *Moscow Mathematical Journal* (MMJ), and receive the electronic versions for FREE.
- Once you arrange access to one or more free electronic versions of AMS Journals, you will have access—at no additional charge—to two electronic-only journals of the AMS, *Conformal Geometry and Dynamics* (ECGD) and *Representation Theory* (ERT).
- Lower rate for the electronic version: Enjoy a lower subscription rate on JAMS, MCOM, PROC, TRAN, and JAG when you choose to receive only the electronic version.

AMS journals include:

- *Bulletin of the American Mathematical Society*
- *Conformal Geometry and Dynamics*
- *Electronic Research Announcements*
- *Journal of the American Mathematical Society*
- *Mathematics of Computation*
- *Proceedings of the American Mathematical Society*
- *Representation Theory*
- *Transactions of the American Mathematical Society*

Benefits of subscribing:

- There are over 6,000 AMS journal articles from 1996 to date available online.
- Articles are now posted online upon acceptance and before appearing in a print issue.
- You can search, browse, view math symbols, and print articles specifically in your discipline.
- We offer free email notification of new articles.
- There is extensive linking between MathSciNet and AMS electronic journals.
- AMS electronic journals are also accessible through OCLC FirstSearch, EBSCO Online, SwetsNet, Dawson Information Quest, and the U.S. Department of Energy's PubSCIENCE.

AMS-distributed journals:

The AMS also distributes scientific journals from other publishers. Contact us for additional information or for a complete list of AMS-distributed journals, visit **www.ams.org/distribution**.

"MathSciNet offers excellent content with powerful search functionality. The 'Basic Search' option provides a single search field, with 'Author' being the default value, reflecting the known usage pattern that the majority of searches in this database are for author. The journals database not only allows searching by title abbreviation, but also tracks recent title changes and links to tables of contents and journal homepages. The author database is an extremely useful tool for identifying and concatenating different versions of an individual's name. The Help documentation provides clear guidance, and a targeted help message frequently accompanies the notice that a search has produced no hits. The novice user will also appreciate the extensive online demonstration. MathSciNet has the edge on timeliness, both for bibliographic citations and for full reviews. It is a major advantage that all reviews from the beginning of MR are included."
